I really enjoyed this seminar and the discussions that we had during class. I thought the class was setup really well and the expectations of the class were clear. Alex asked very thought provoking questions for the weekly readings and class discussions. I also liked the flexibility that Alex allowed for missing one class.

Best professor. I love this course so much. I will definitely miss taking this course. She's kind and helpful and encourages us to do our best. This course is the best I have ever had at ucsb and I feel most professors should be as great as Dr. Phillips

I enjoyed this class and the readings.. I think the structure worked out well, sometimes I didn't feel like filling out the questions ahead of time but then it did usually help for facilitating discussion

I really enjoyed taking this class because the papers were interesting and broadened my perspective. Above all, I enjoyed Alex's teaching. She is one of the best instructors I've ever had. I look up to her because she knows how to create safe spaces where students can feel comfortable while engaging in a discussion and expressing their ideas--I hope to accomplish this in the future with my own students. Furthermore, she communicates clearly, is very responsible, and prioritizes her students' success in and outside the class.

This course was thoughtful and well designed. The course relies on student participation in discussion, and the instructor tried their best to engage students who were at all different levels of knowledge and comfortability on the subject--including having a mixture of undergraduate and graduate students. The course was extremely valuable in terms of bringing such a critical and important topic (diversity, equity, and inclusion) to geosciences specifically. The reflection questions asked for homework and guided discussion points struck a key balance in trying to evaluate academic studies on their methods and merit while discussing the general material (DEI) and why it is relevant and critical to our world in academia and as scientists. Very refreshing to see this course offered and I hope it will become part of the regular offerings!

This class was excellent. The way it was structured was useful and intuitive in that each week built upon the previous week. Alex was approachable, friendly, enthusiastic, and knowledgeable about the topic. She made the classroom a very safe, respectful space, which allowed for their to be meaningful and deep discussion every class. She was always organized and well-prepared for class. I think this class is super important for the department to have and support given that it provides invaluable information about how we all can make efforts to improve DEI in the department.
