

# ESM 438 Week Three

**Slide Design**

**Instructor: Alex Phillips**

UC SANTA BARBARA  
Bren School of Environmental  
Science & Management

# By the end of this class you will have a completed 10-15 minute presentation

## Lecture

## Lab

General Public Speaking Skills	Movie Monologues & Elevator Pitches
Outlining Presentations	Short Story & Introductions
<i>Presenting Data &amp; Slide Design</i>	<i>Methods &amp; Results</i>
Answering Questions	Conclusions with Q & A
Student Choice!	Full Presentations

# Considerations for choosing a presentation platform

## *Pros:*

## *Cons:*

Google Slides	High collaboration potential, easy to share, free	Requires internet connection, glitchy formatting
Powerpoint	Very customizable, extensive features	Expensive software, hard to do teamwork
Canva	Great default colors, fonts, & graphics	Limited utility and customization

# Presenting data can be a make or break part of your presentations

## *Considerations:*

1. Simplifying
2. Annotating
3. Animating
4. Replotting

# Recommended Data Viz & Graphic Design Tools:

## **Drawing:**

Procreate  
\$10

## **Plotting:**

R Studio  
free

## **Editing:**

Affinity Designer  
\$55

## **Photo:**

Capture One  
\$300

## **Layout:**

Affinity Publisher  
\$55

Sketches Pro  
\$6

Microsoft Excel  
\$7/month

Adobe Illustrator  
\$240/yr

Adobe Lightroom  
\$120/yr

Adobe InDesign  
\$240/yr

# **Presentation figures can be simplified to amplify your main message and save time**

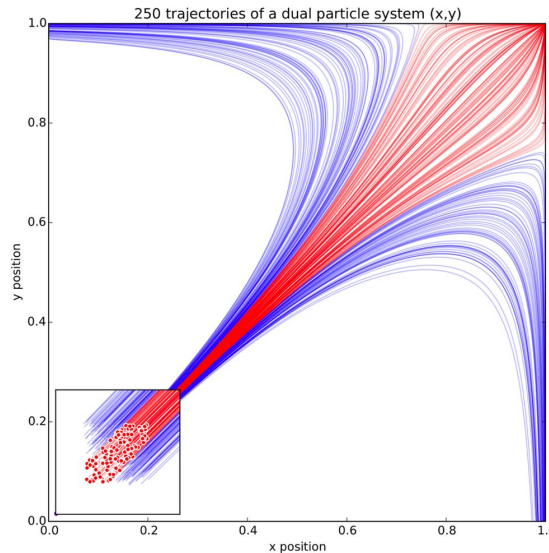

*“The skill of data  
storytelling is  
removing the noise  
and focusing  
people’s attention on  
the key insights”*

**- Brent Dykes**

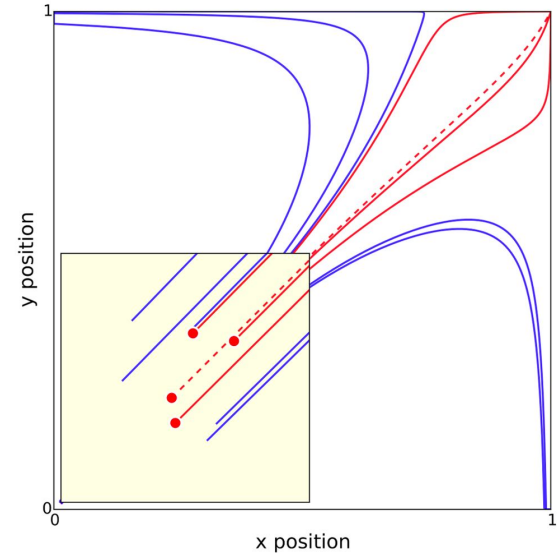

# Presentation figures can be simplified to amplify your main message and save time

*“The skill of data storytelling is removing the noise and focusing people’s attention on the key insights”*  
- Brent Dykes

**Publication:**

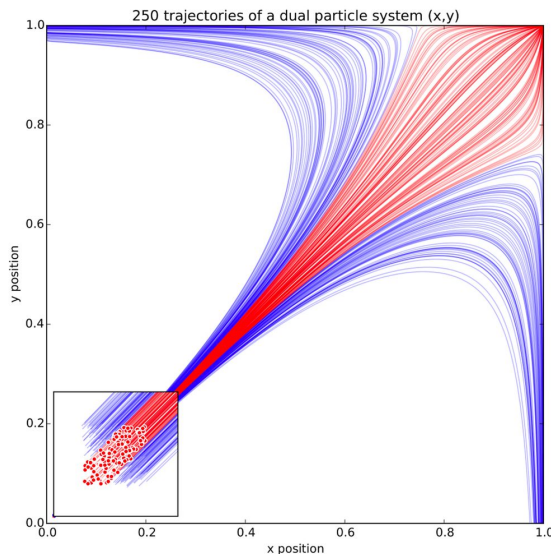

**Presentation:**

*What differences do you notice?*

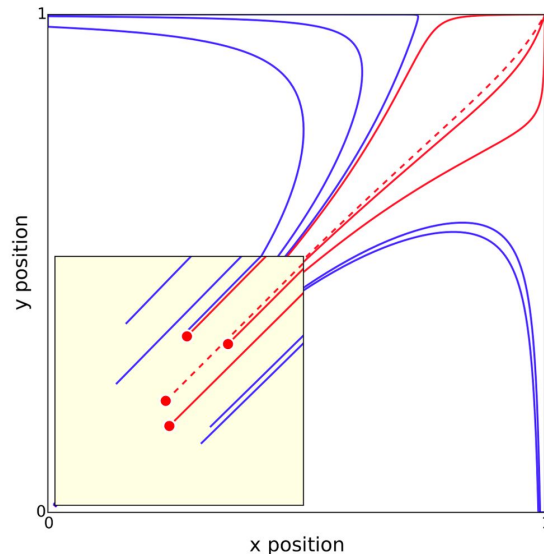

# Presentation figures can be simplified to amplify your main message and save time

**Publication:**

- Bigger axes labels
- Thicker data lines
- Larger symbols
- Reduced tick marks
- Color for attention

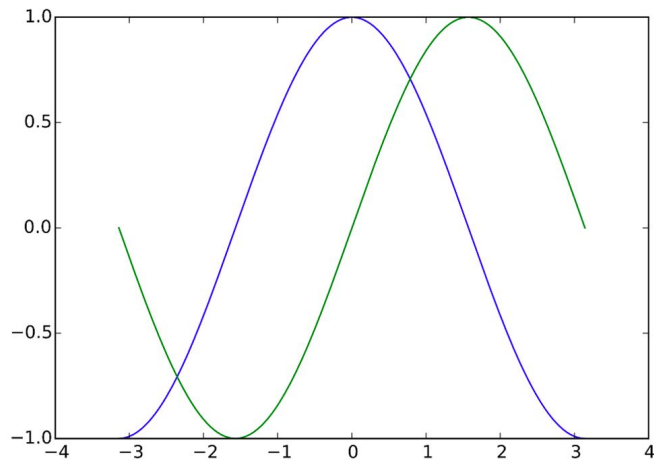

**Presentation:**

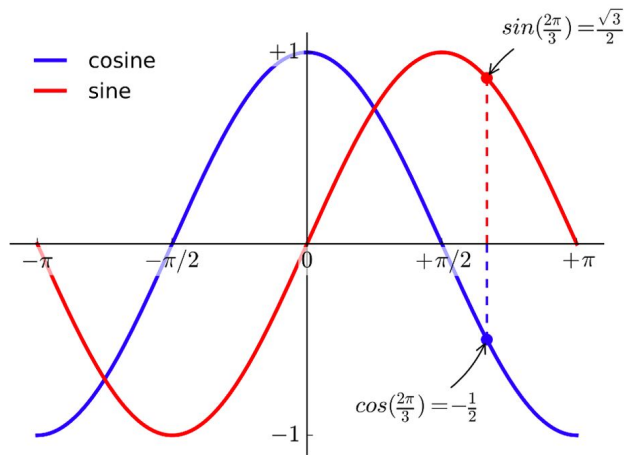

*What differences do you notice?*

# Annotating your data brings attention to your main message

**Default:**

**Annotated:**

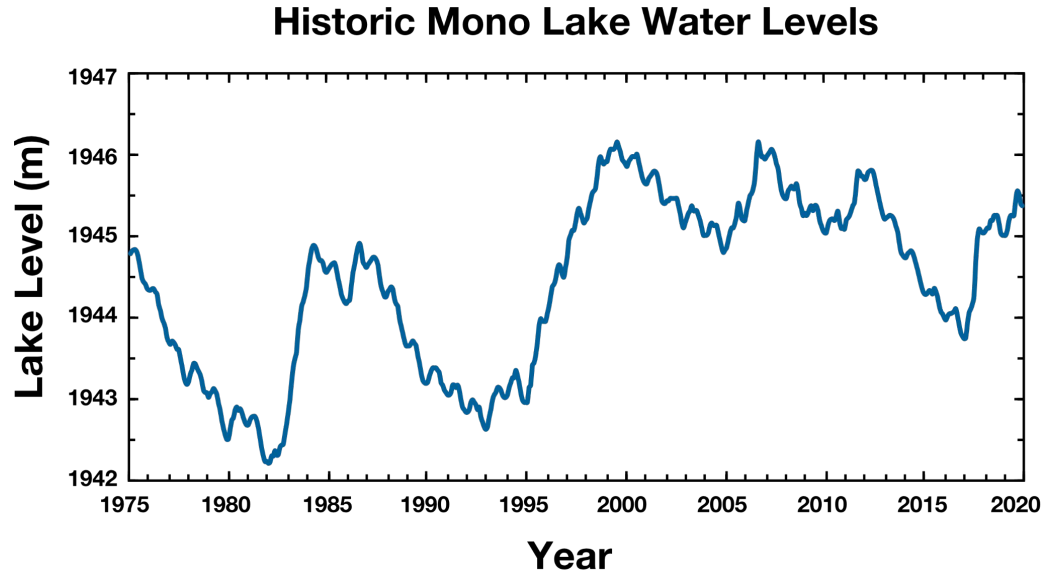

*What differences do you notice?*

# Annotating your data brings attention to your main message

## **Annotation Tips:**

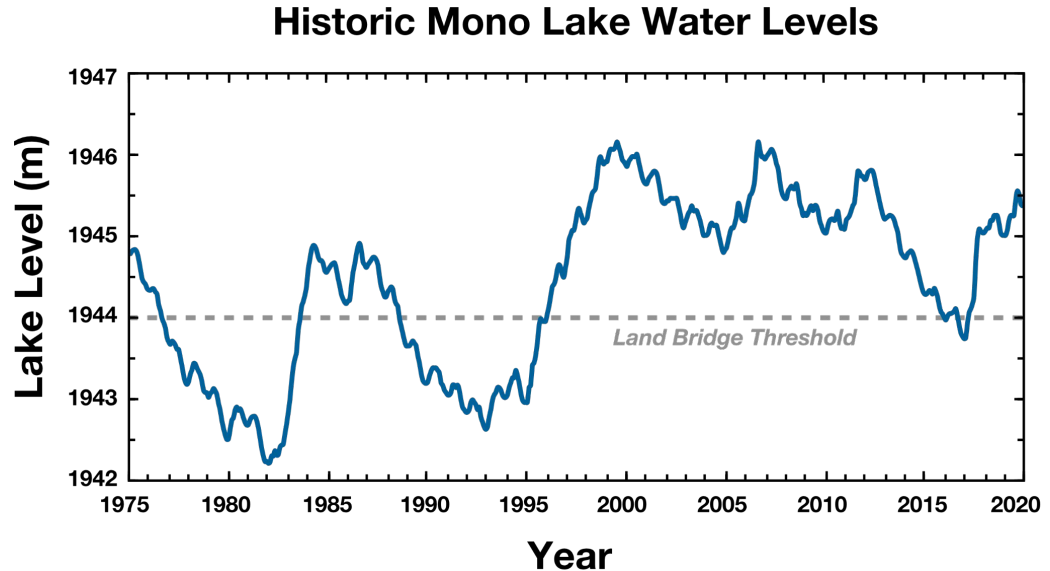

- Threshold lines

# Annotating your data brings attention to your main message

## **Annotation Tips:**

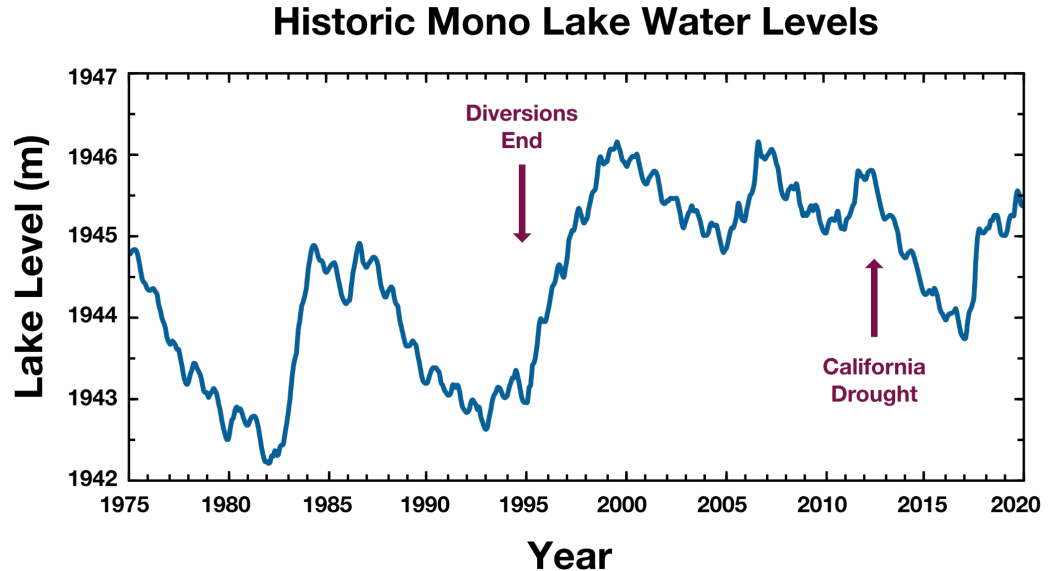

- Threshold lines

# Annotating your data brings attention to your main message

## **Annotation Tips:**

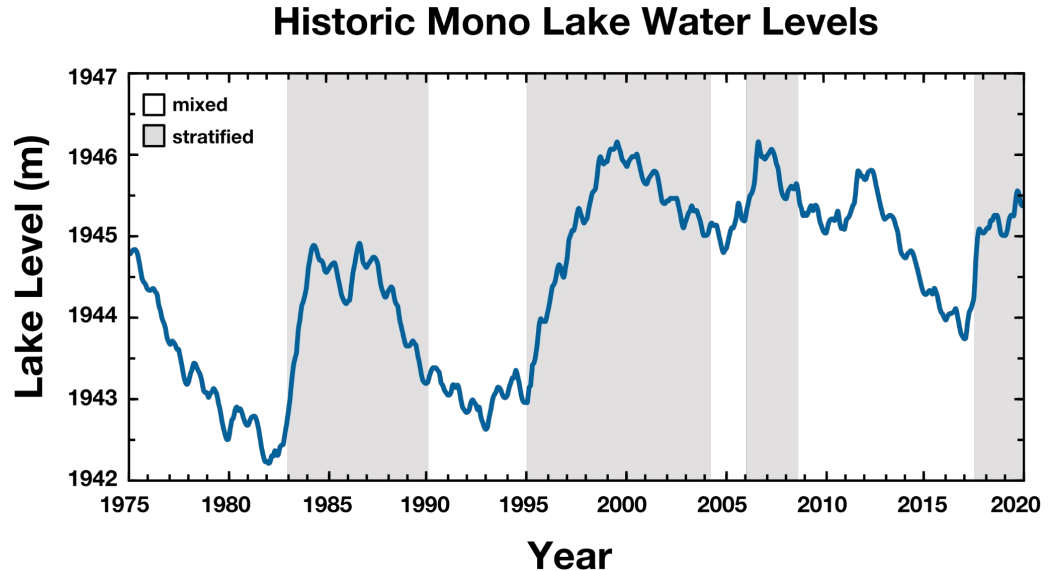

- Threshold lines
- Arrows and labels

# Annotating your data brings attention to your main message

## **Annotation Tips:**

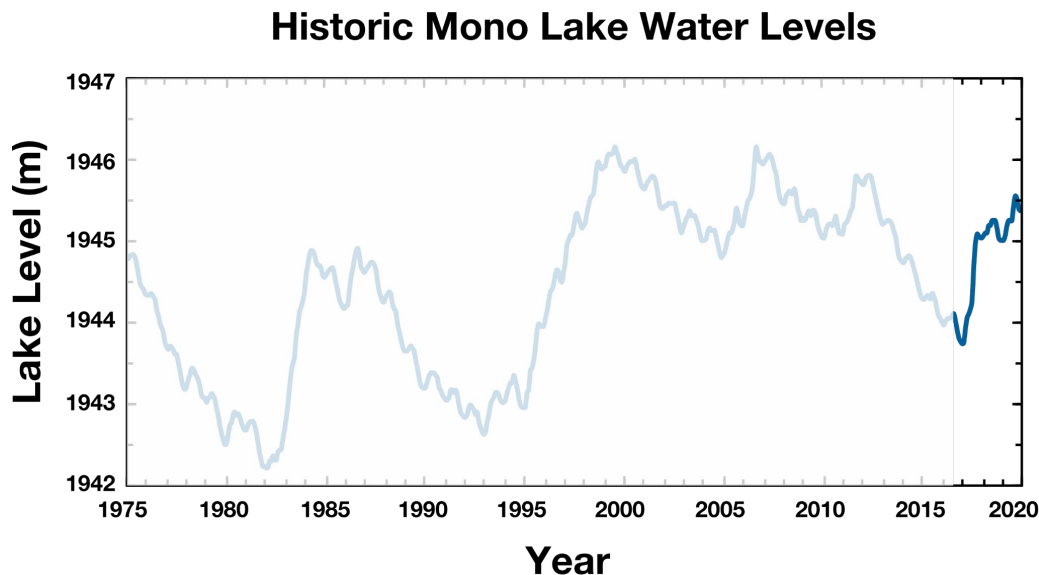

- Threshold lines
- Arrows and labels
- Background shading

# Annotating your data brings attention to your main message

## **Annotation Tips:**

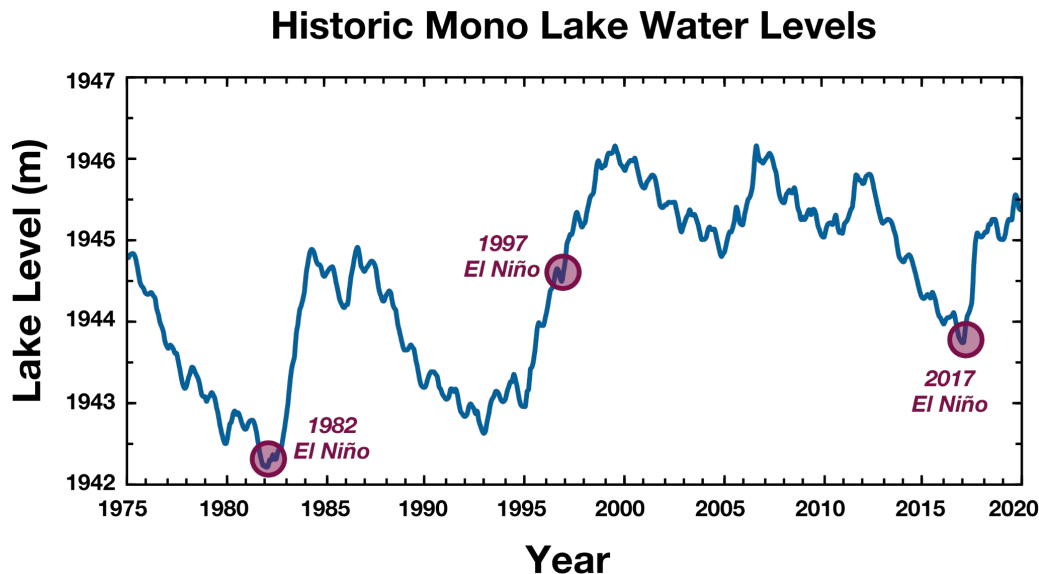

- Threshold lines
- Arrows and labels
- Background shading
- Transparent boxes

# Annotating your data brings attention to your main message

## Annotation Tips:

- Threshold lines
- Arrows and labels
- Background shading
- Transparent boxes
- Circles or boxes

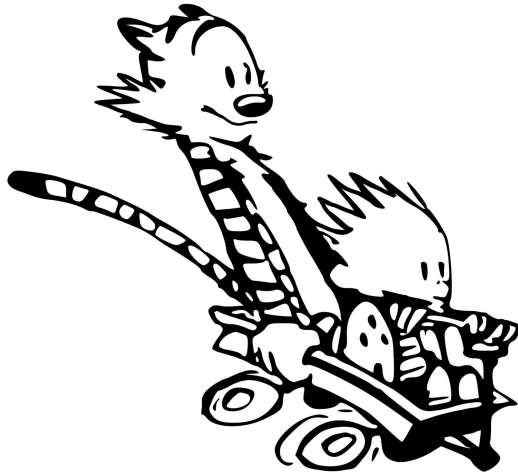

# Animating your data helps anchor your audience and tell a story

## ***Animation Tips:***

- For complex plots, consider starting with just the axes
- Spend time introducing your axes, including units
- Especially helpful if axes change throughout plots
- Use animations to help tell a story and increase engagement
- Avoid multiple plots in one slide unless necessary for comparison

# Example of how to animate science data

***With storytelling!***

From my research on the sulfur  
isotopes of the amino acids  
cysteine and methionine

*How did animation impact your  
impression of the data?*

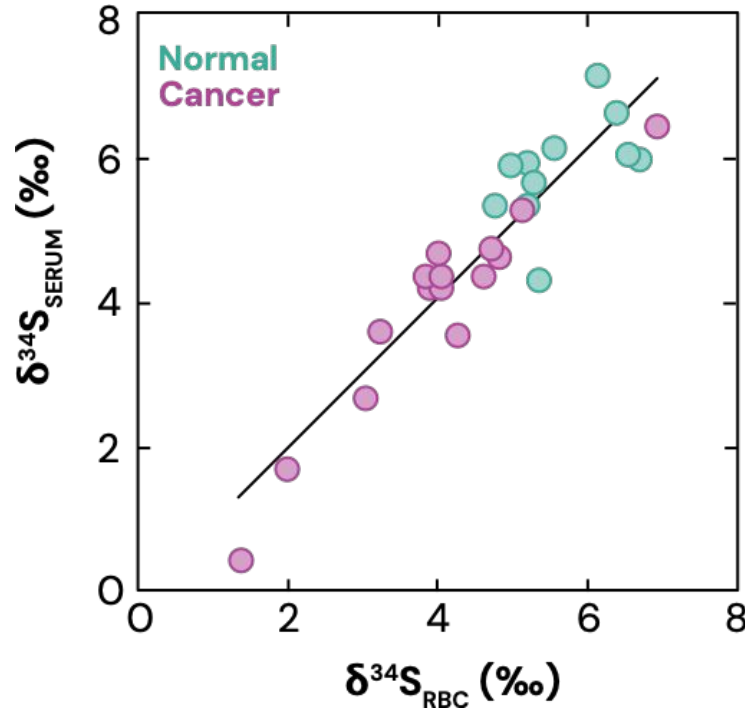

*With the story?*

# Sulfur isotopes may provide a biomarker for liver cancer

*“In cancer, the metabolism of copper and sulfur are dysregulated, leading to deleterious side effects”*

**Balter et al. 2016**

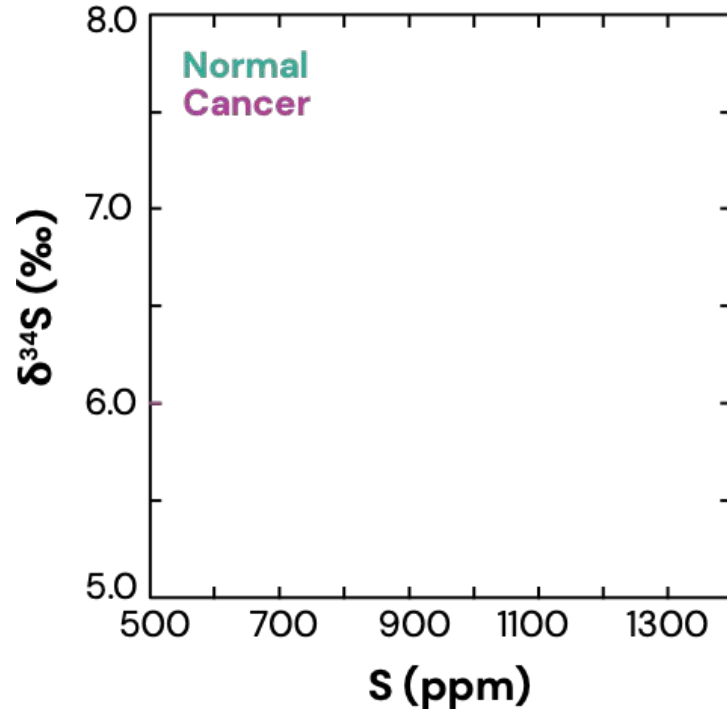

# Sulfur isotopes may provide a biomarker for liver cancer

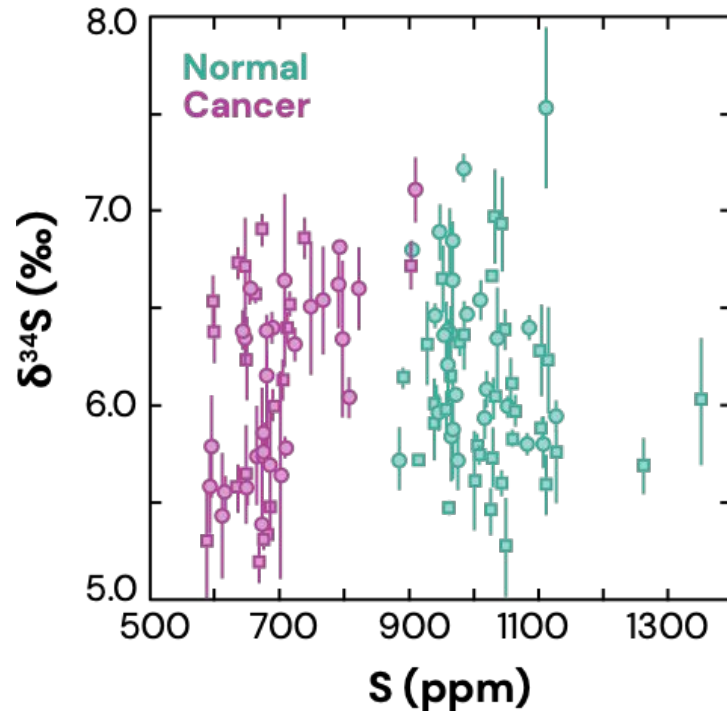

*“In cancer, the metabolism of copper and sulfur are dysregulated, leading to deleterious side effects”*

**Balter et al. 2016**

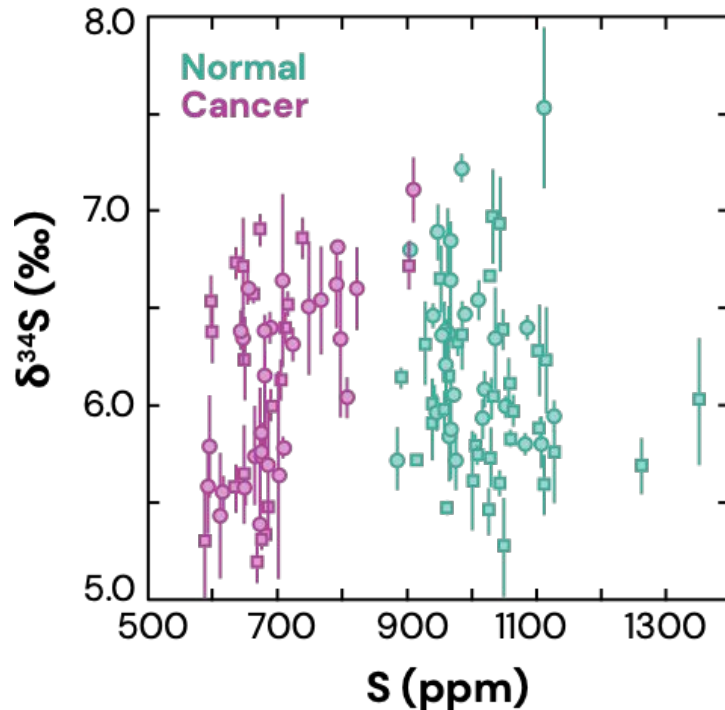

# Follow up studies revealed issues with sulfate as a biomarker

# Follow up studies revealed issues with sulfate as a biomarker

# Follow up studies revealed issues with sulfate as a biomarker

*“We speculate that the origin of the present scatter lies in the balance of glutathione and methionine.”*

**Balter et al. 2016**

# Replotting data improves slide cohesion and messaging

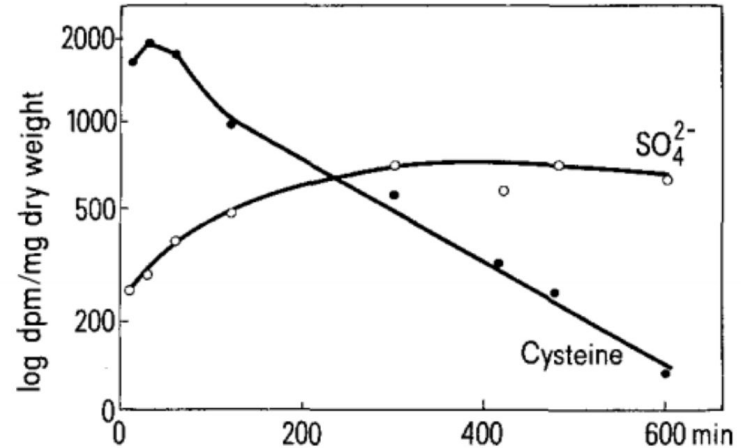

## *When to re-plot older data:*

- When you have extra time!
- Improving overall aesthetics

# Replotting data improves slide cohesion and messaging

## *When to re-plot older data:*

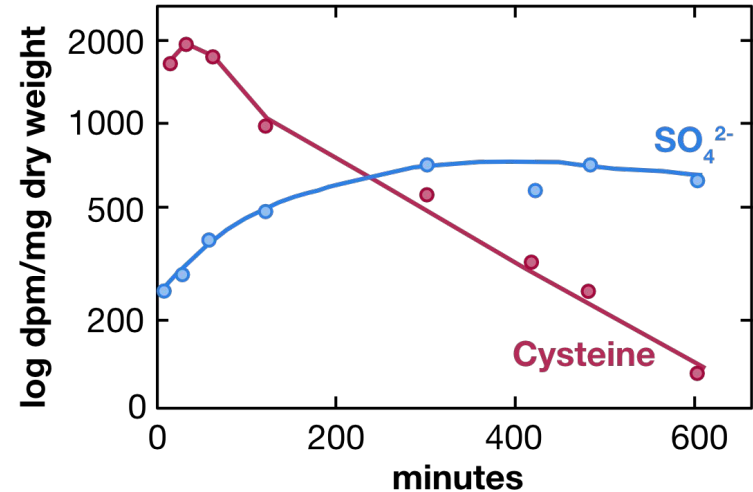

- When you have extra time!
- Improving overall aesthetics
- Figure is very low resolution

# Replotting data improves slide cohesion and messaging

## *When to re-plot older data:*

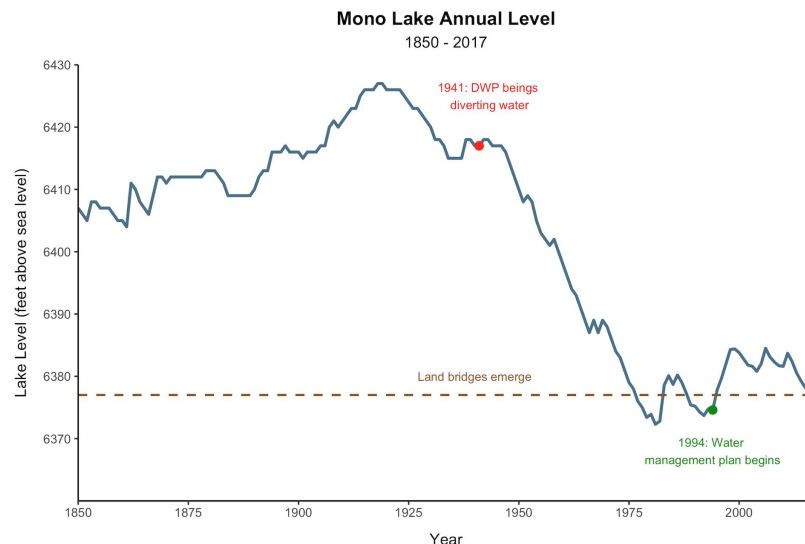

- When you have extra time!
- Improving overall aesthetics
- Figure is very low resolution

# Replotting data improves slide cohesion and messaging

## *When to re-plot older data:*

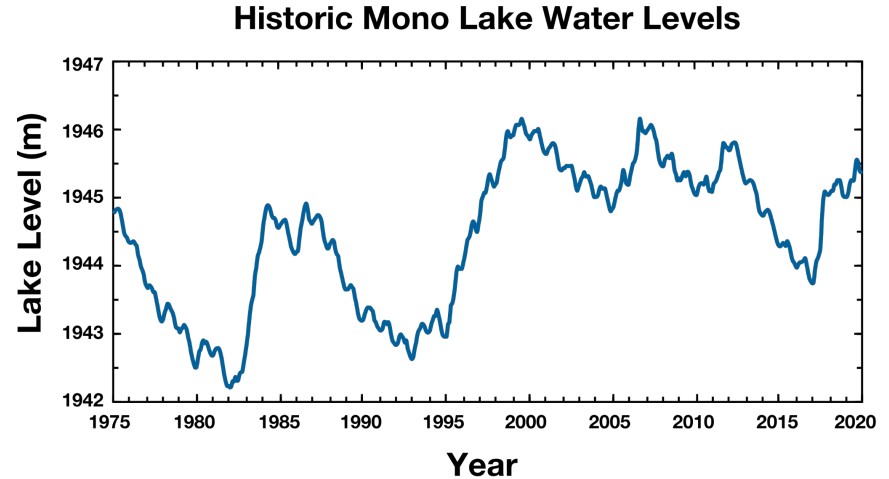

- When you have extra time!
- Improving overall aesthetics
- Figure is very low resolution
- Data needs to be updated

# Replotting data improves slide cohesion and messaging

## *When to re-plot older data:*

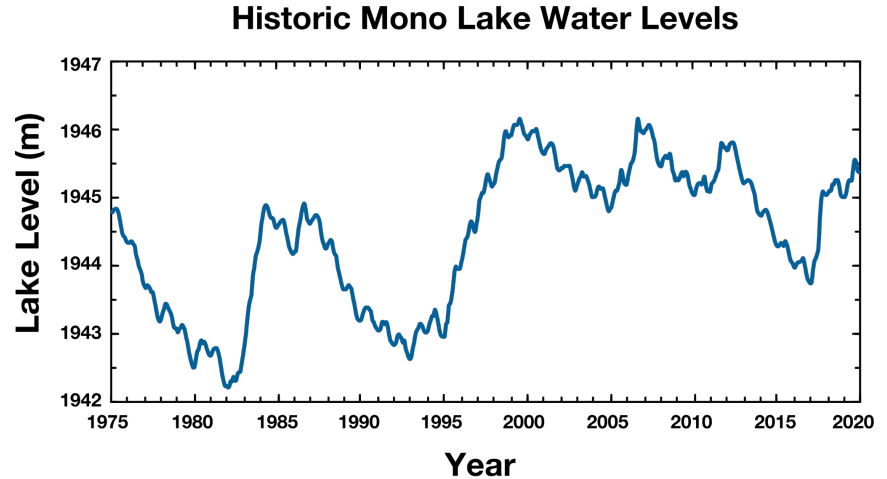

- When you have extra time!
- Improving overall aesthetics
- Figure is very low resolution
- Data needs to be updated

# Replotting data improves slide cohesion and messaging

## *When to re-plot older data:*

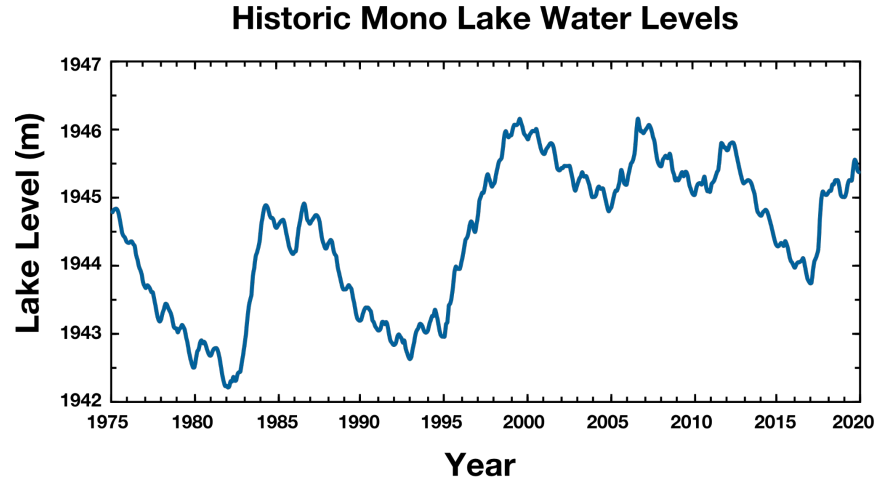

- When you have extra time!
- Improving overall aesthetics
- Figure is very low resolution
- Data needs to be updated
- Only a subset of data is needed

# Replotting data improves slide cohesion and messaging

## *When to re-plot older data:*

- When you have extra time!
- Improving overall aesthetics
- Figure is very low resolution
- Data needs to be updated
- Only a subset of data is needed
- To be able to animate it

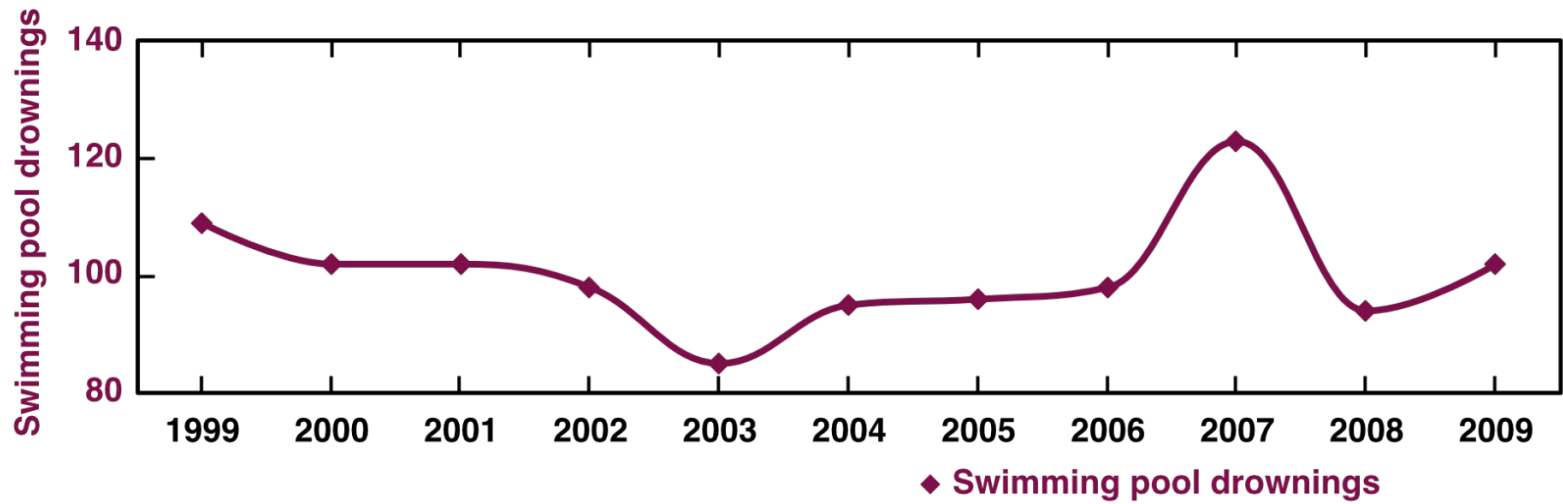

# Time to practice presenting data with animations!

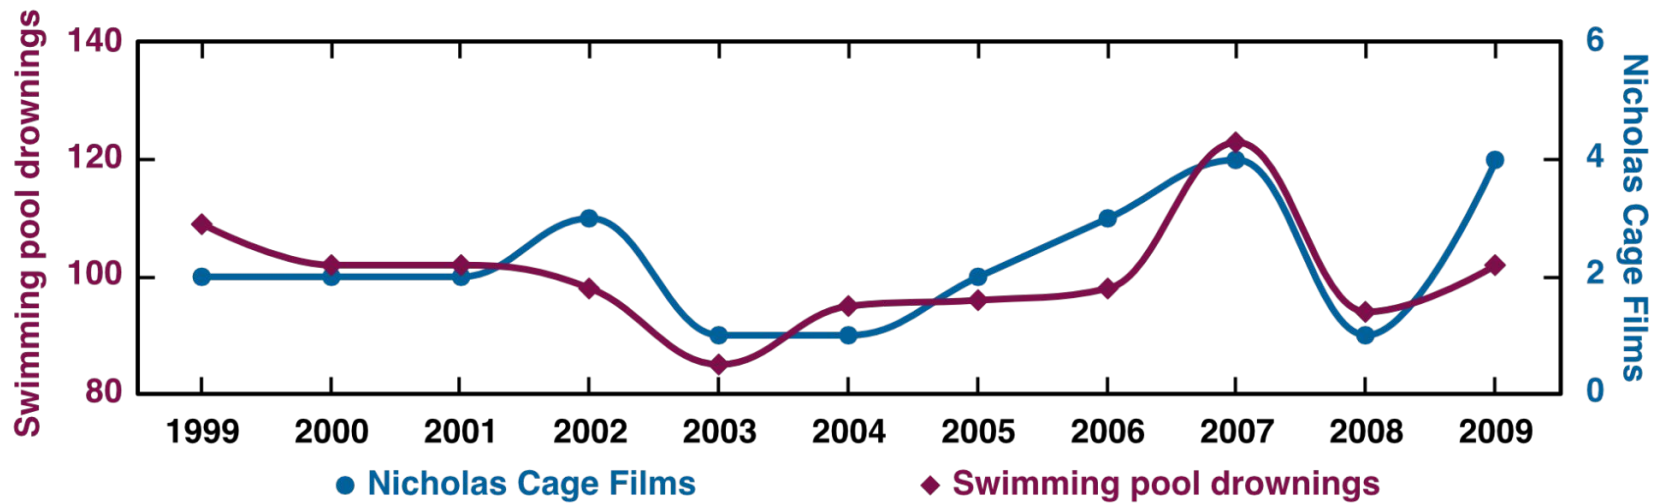

## ***Powerpoint karaoke tasks:***

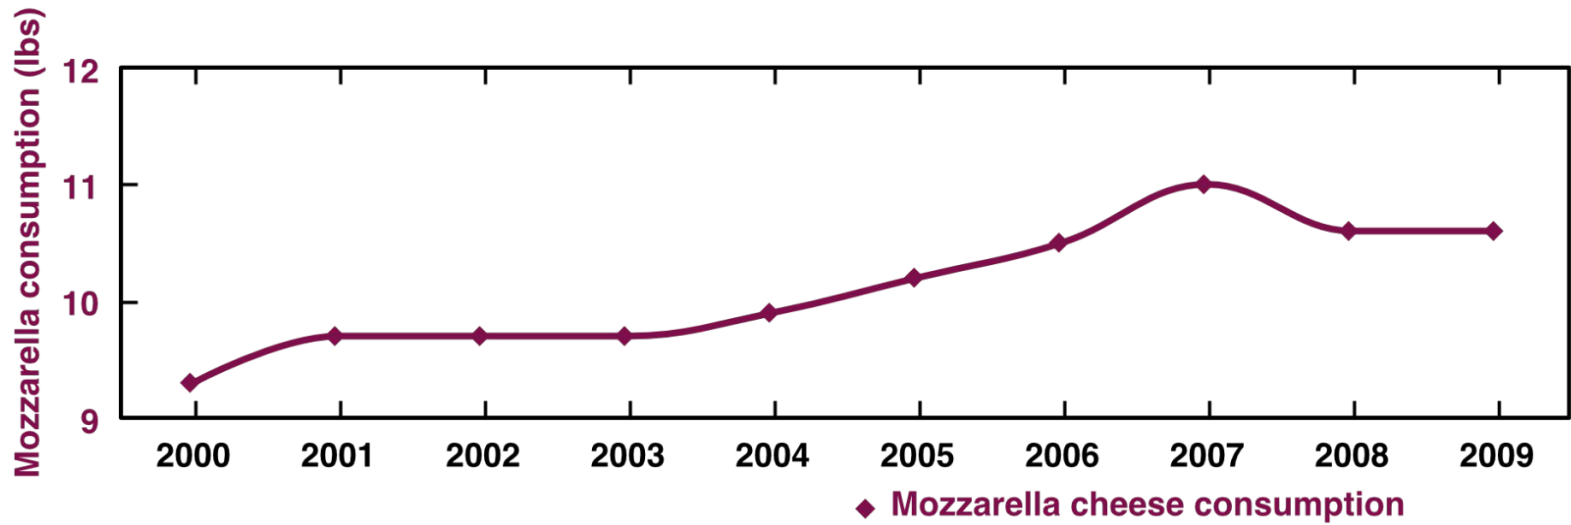

- Introduce the audience to the X and Y axes
- Explain the main data trend
- I'll click the slide and new data will appear
- Create one to two main takeaways from the correlation

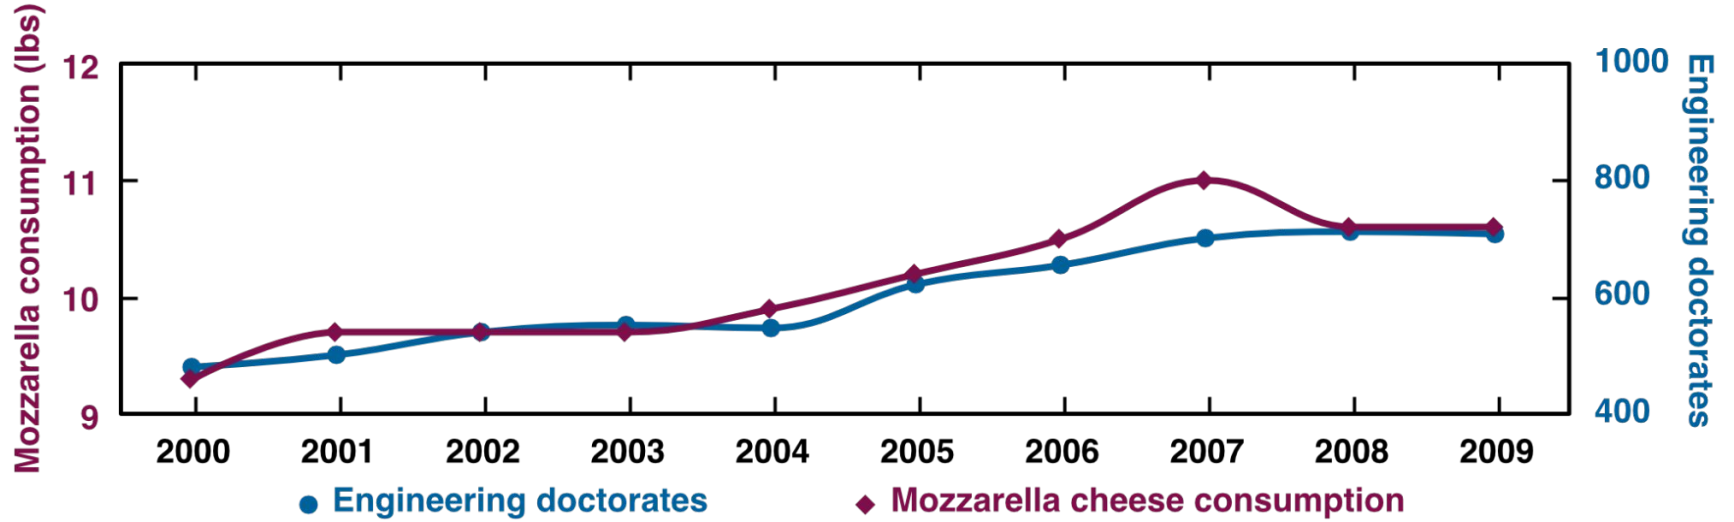

***Volunteer #1!***

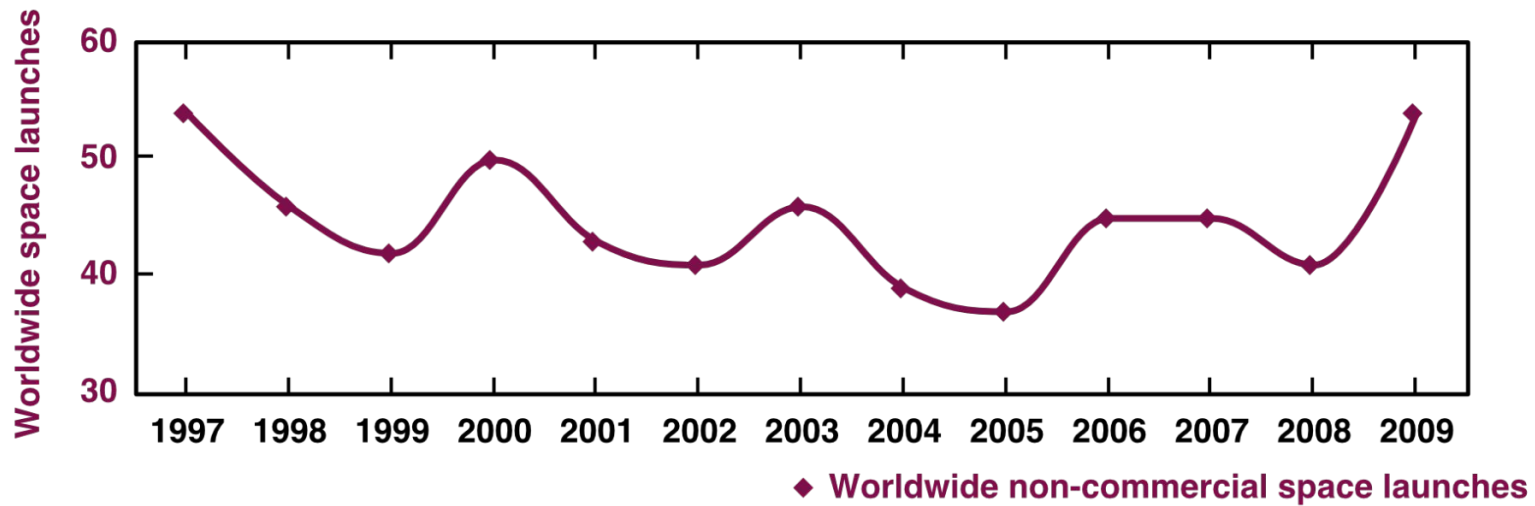

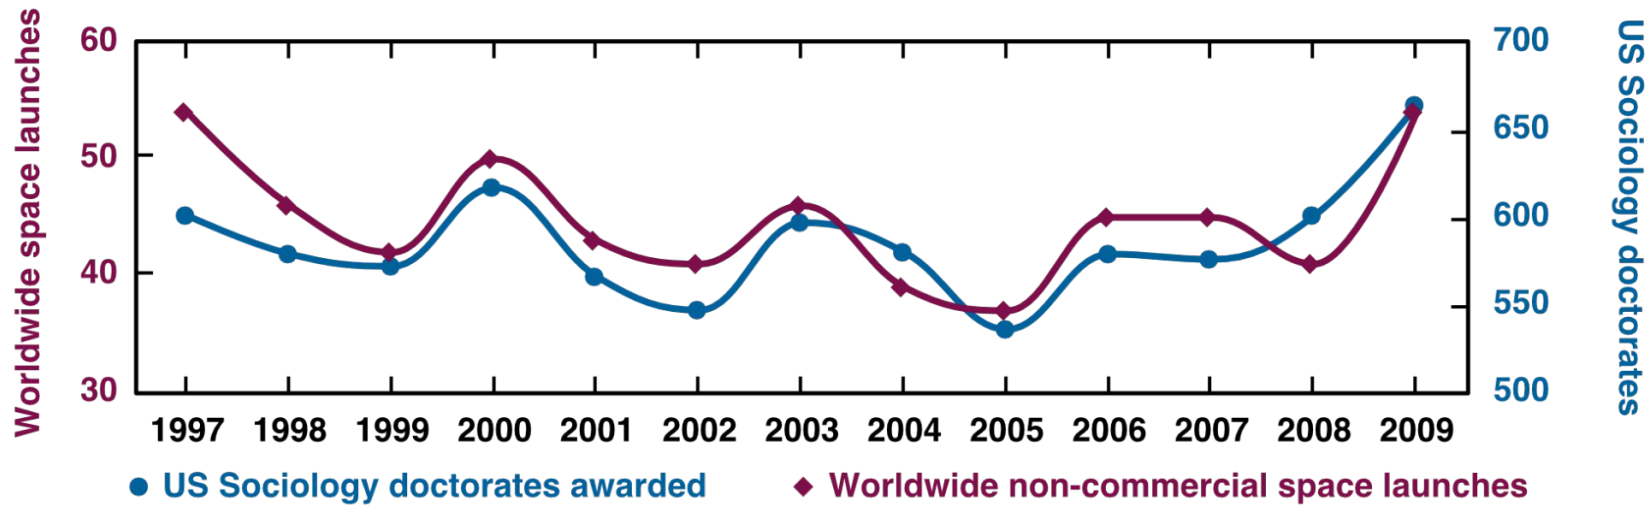

***Volunteer #2!***

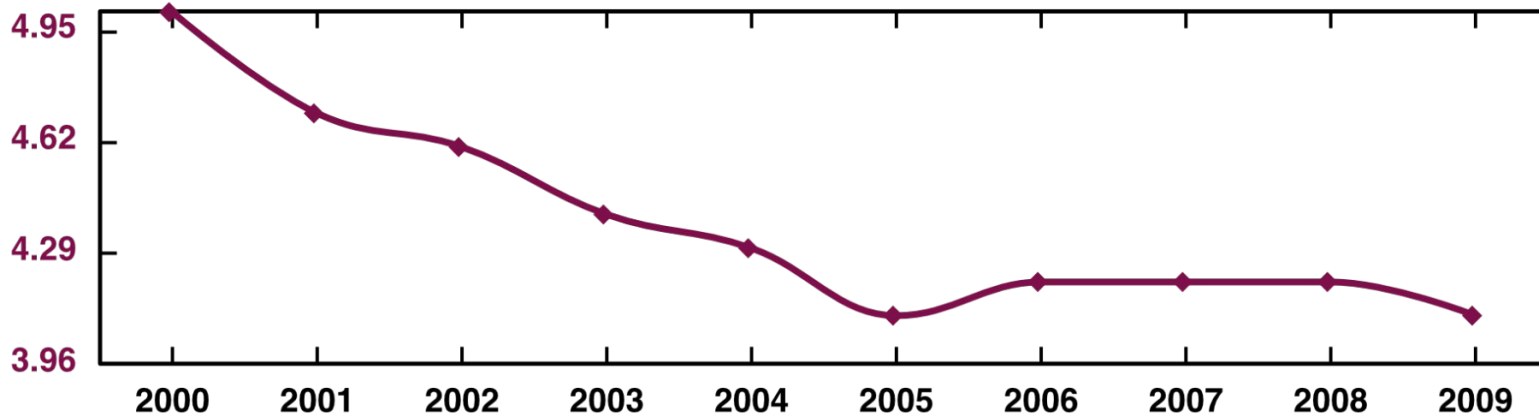

***Volunteer #3!***

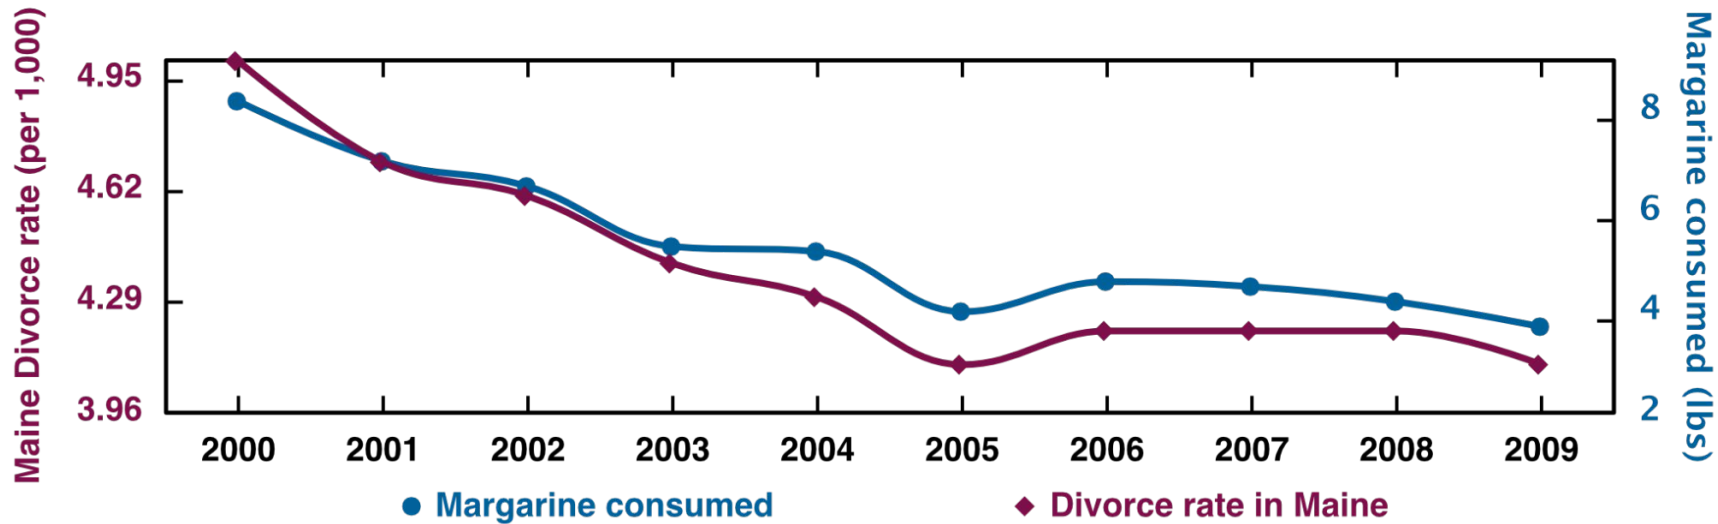

***Volunteer #4!***

Maine Divorce rate (per 1,000)

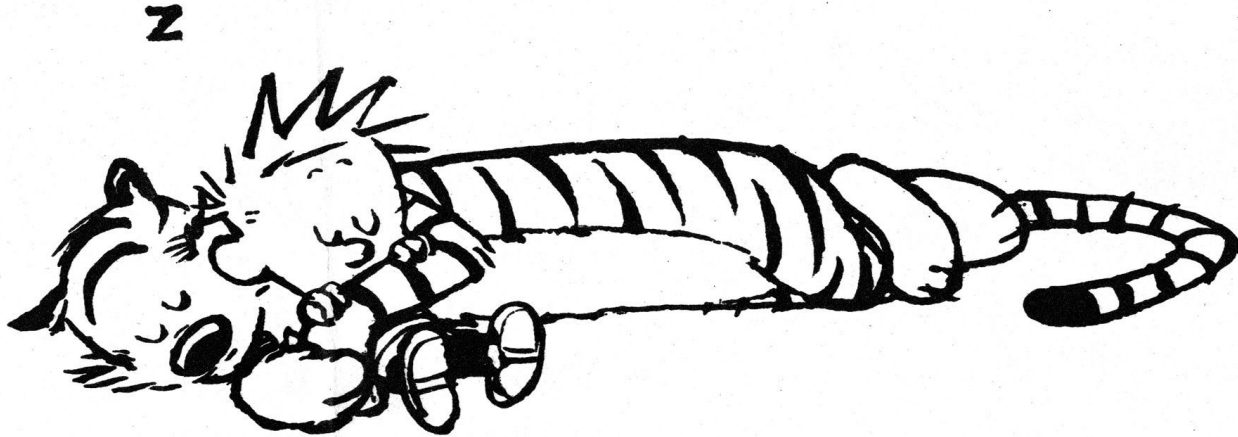

◆ Divorce rate in Maine

# Break!

*Take five to ten minutes for yourself*

# Good slide design should be the last step in preparing presentations

## ***Design considerations:***

1. Text
2. Colors
3. Visuals

# Typography helps your presentation stand out visually

## **The role of the early socioeconomic environment in shaping the ontogeny of preferences across societies**

- Past work suggests that local features of the environment can have an important influence on the ontogeny of preferences and downstream decision-making
- Environmental factors, such as market integration and socioeconomic status, may shape preferences in systematic ways, but most of these studies have been conducted among adults in WEIRD societies
- There is still much we don't know about the causal pathways through which local inputs shape behavioral outputs across development, and how persistent these behavioral outputs are across the lifespan

***Text Tip #1: Less is More***

# Typography helps your presentation stand out visually

How does the early  
environment shape  
preferences ?

*Text Tip #1: Less is More*

# Typography helps your presentation stand out visually

How does the early  
environment shape  
preferences ?

## *Text Tip #1: Less is More*

- Minimizing text improves conversational tone
- Less text means less reading to your audience
- Remember: one slide, one idea!

# Typography helps your presentation stand out visually

## ***Text Tip #2: Use Multiple Fonts***

*Three fonts to choose for presentations:*

1. Titles: Large text (~30), serif or sans-serif
  2. Main Text: Medium text (~20), sans-serif
  3. Figures: Consistent, plain sans-serif font
- Resources: [google fonts](#), [fontpair](#)

# Typography helps your presentation stand out visually

## ***Text Tip #3: Use bolding, italics, etc.***

- Most google fonts have six or more boldness/italics options, use them!

### ORGANIC SULFUR AND SOCIAL MEDIA:

INSIGHTS IN CARBON AND SULFUR CYCLING AND  
THE ROLE OF INSTAGRAM ON STEM IDENTITY

---

Alexandra Atlee Phillips, PhD

@alexploring

# Typography helps your presentation stand out visually

## ***Text Tip #3: Use bolding, italics, etc.***

- Most google fonts have six or more boldness/italics options, use them!

### **ORGANIC SULFUR AND SOCIAL MEDIA:**

*INSIGHTS IN CARBON AND SULFUR CYCLING AND  
THE ROLE OF INSTAGRAM ON STEM IDENTITY*

---

Alexandra Atlee Phillips, PhD

@alexploring

# Typography helps your presentation stand out visually

## ***Text Tip #3: Use bolding, italics, etc.***

- Most google fonts have six or more boldness/italics options, use them!
- Use bolding and italicizing consistently in presentations
- Save underlining for links only!
- Consider using colored highlights

### **ORGANIC SULFUR AND SOCIAL MEDIA:**

*INSIGHTS IN CARBON AND SULFUR CYCLING AND  
THE ROLE OF INSTAGRAM ON STEM IDENTITY*

**A strategic color scheme is a powerful  
science storytelling tool**

# A strategic color scheme is a powerful science storytelling tool

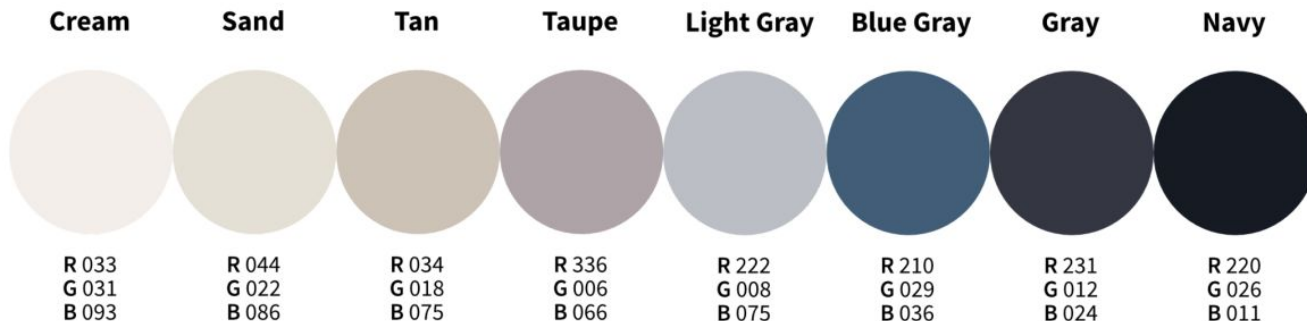

**Color Tip #1: Grayscale is good!**

# A strategic color scheme is a powerful science storytelling tool

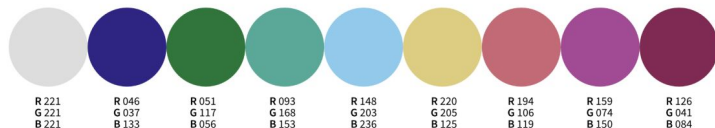

## *Color Tip #2: Establish a color scheme*

- Consider local inspiration (e.g. [Calecopal](#))
- Draw inspiration from color trends: [Color Hunt](#), [Coolers](#), [Adobe Color](#)
- Consider alternative neutrals like creams, greys, navys

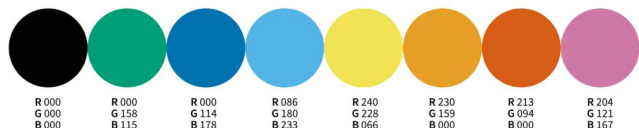

# A strategic color scheme is a powerful science storytelling tool

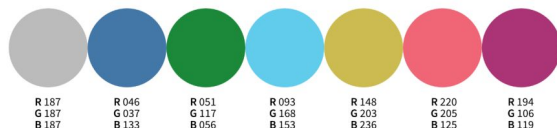

Paul Tol's Muted

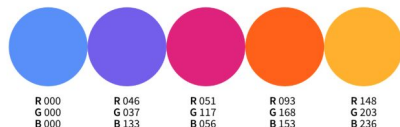

Okabe and Ito

Paul Tol's Bright

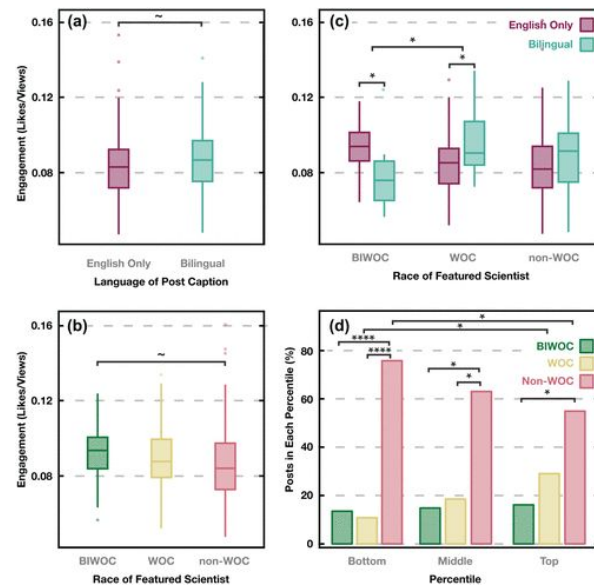

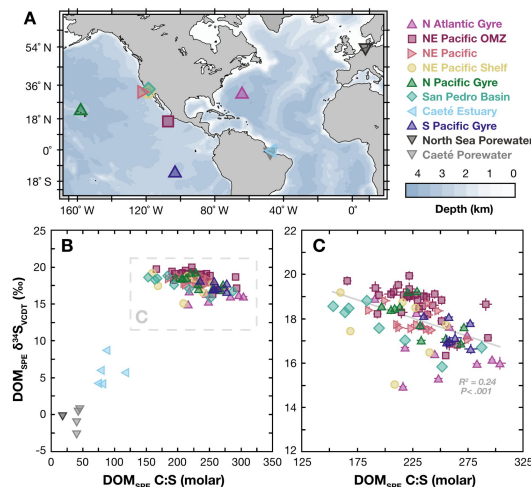

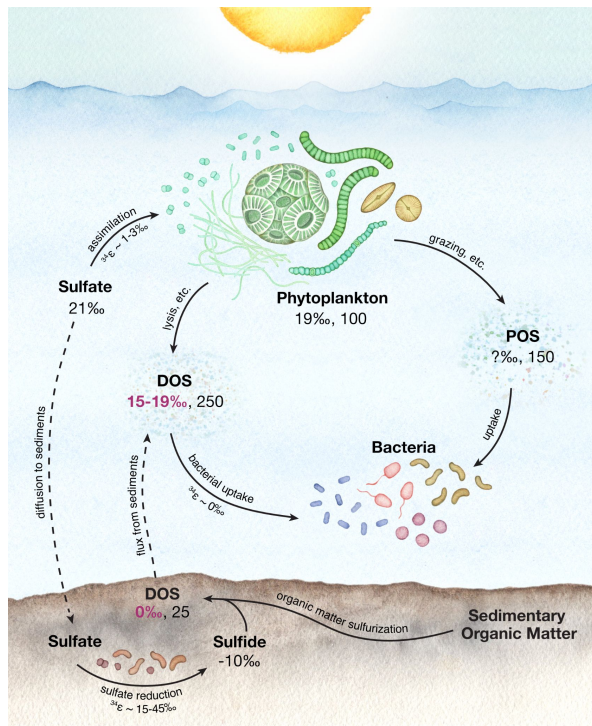

IBM Design Library

## *Color Tip #3: Consider Colorblind Vision*

- 8% of men have color vision impairment
- Especially important for publication
- Even in presentations, avoid red/green
- Watch out for rainbow color maps
- Resources: [Color Oracle](#), [Viridis R Package](#), [Paul Tol](#)

# A strategic color scheme is a powerful science storytelling tool

**Color Tip #4: Reuse your favorites!**

# A strategic color scheme is a powerful science storytelling tool

Text color: #FFFFFF Background color: #B9D0E9

Contrast: 1.58 Very poor ★☆☆☆☆

Small text ★☆☆ Large text ★☆☆

Poor contrast for all text sizes. [Click to fix](#)

Quote n. 5

The third-rate mind is only happy when it is thinking with the majority. The second-rate mind is only happy when it is thinking with the minority. The first-rate mind is only happy when it is thinking.

A. A. Milne

Text color: #FFFFFF Background color: #214469

Contrast: 10.02 Very good ★★★★★

Small text ★★★ Large text ★★★

Good contrast for small text (below 18pt) and great contrast for large text (above 18pt or bold above 14pt). [Click to enhance](#)

Quote n. 5

The third-rate mind is only happy when it is thinking with the majority. The second-rate mind is only happy when it is thinking with the minority. The first-rate mind is only happy when it is thinking.

A. A. Milne

## Color Tip #5: Check Contrast Scores

- Web accessibility guidelines offer standards for color contrast
- Especially helpful for using colored slide backgrounds
- Resources: [Coolers Contrast Checker](#)

# Create a personal logo, with a customized font and color scheme

To get a sense of your personal graphic design style, play around with the [Adobe Logo Maker](#) platform.

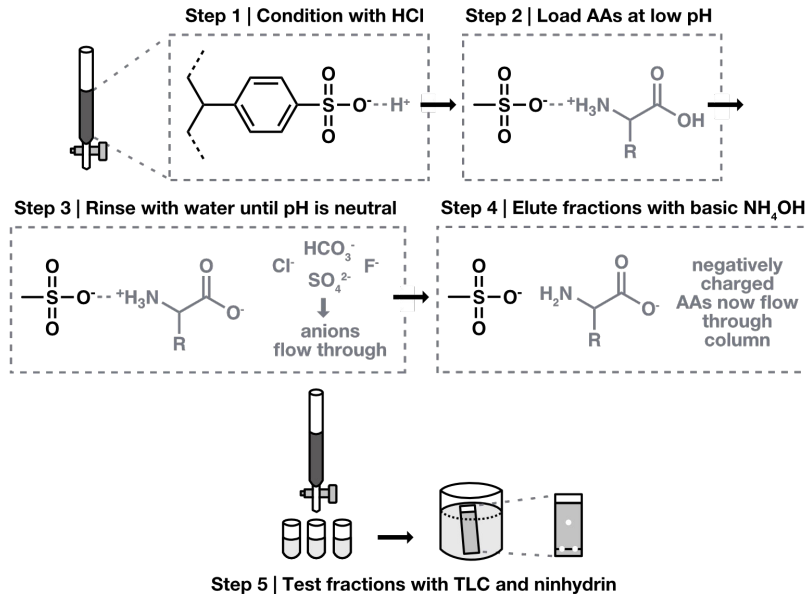

Example: [Sam Csik, Environmental Data Scientist](#)

## **Activity!**

*Share your logo with the the class.*

**Effective visuals improve attention,  
understanding, and memory**

# Effective visuals improve attention, understanding, and memory

## *Visuals Tip #1: Consider icons*

- Especially helpful for methods or “agenda” slides (headers)
- Great alternatives when you don’t have other visual options
- Resources: [Noun Project](#), [My Website](#), [Font Awesome](#)

# Effective visuals improve attention, understanding, and memory

## ***Visuals Tip #2: Add Photos***

- Add landscapes that relate to study
- Bigger photos make bigger impacts

**In 2017, Mono Lake was hit with record snow.**

# Effective visuals improve attention, understanding, and memory

## *Visuals Tip #2: Add Photos*

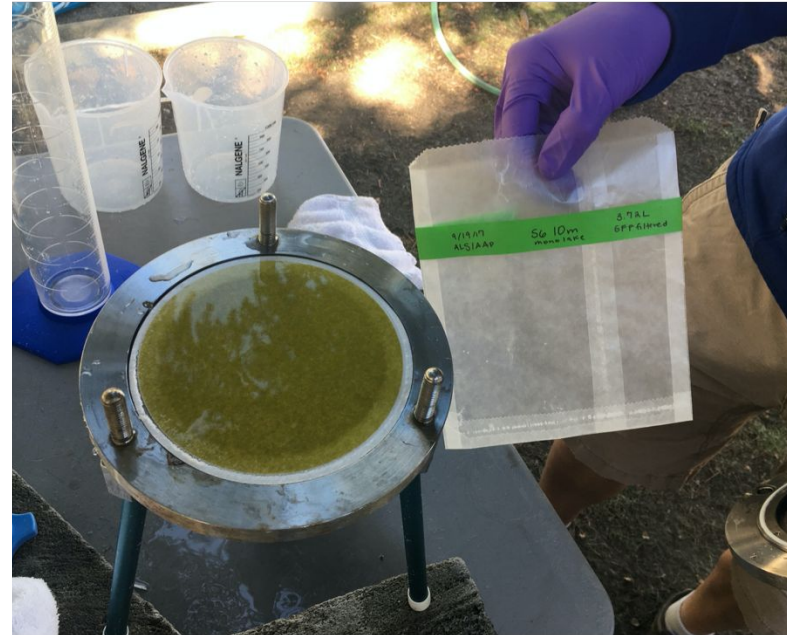

- Add landscapes that relate to study
- Bigger photos make bigger impacts
- Aim for landscapes with tension

# Effective visuals improve attention, understanding, and memory

## *Visuals Tip #2: Add Photos*

- Add landscapes that relate to study
- Bigger photos make bigger impacts
- Aim for landscapes with tension
- Add photos of the science at work

# Effective visuals improve attention, understanding, and memory

## *Visuals Tip #2: Add Photos*

- Add landscapes that relate to study
- Bigger photos make bigger impacts
- Aim for landscapes with tension
- Add photos of the science at work
- Don't be afraid to show yourself or colleagues doing science!

# Effective visuals improve attention, understanding, and memory

## *Visuals Tip #2: Add Photos*

- Add landscapes that relate to study
- Bigger photos make bigger impacts
- Aim for landscapes with tension
- Add photos of the science at work
- Don't be afraid to show yourself or colleagues doing science!
- Do what feels like your personality

# Effective visuals improve attention, understanding, and memory

## *Visuals Tip #2: Add Photos*

- Add landscapes that relate to study
- Bigger photos make bigger impacts
- Aim for landscapes with tension
- Add photos of the science at work
- Don't be afraid to show yourself or colleagues doing science!

Resources:

- [ocean photos](#)
- [Unsplash](#)
- [creative commons](#)
- [university images](#)

# Effective visuals improve attention, understanding, and memory

## *Visuals Tip #2: Consider videos!*

- Especially helpful to break up long talks
- Similar to photos, can be of science, scientists, or field sites
- Can save time by showing or emphasizing something that's hard to explain
- For longer videos, offers time to narrate

# Lab one will include an activity for tone, pacing, and posture, plus elevator pitch practice

## **Assignment One**

Prepare the middle third of your talk, focusing on data presentation, methods, and results. Edit slide design as needed.

**Announcement:**

***No office hours this Thursday!***

**Any questions?**

***Next class: Answering Questions***
